

## Levens Playing Fields Youth Consultation - 2021

KEY are working in partnership with the Levens Playing Fields Committee and a core group of Young People exploring facilities for young people in the village.

The young people started with a questionnaire in November 2020. The feedback from the young people of the village showed that their most popular choices were a pump track and a skate park.

A group of young people have since been meeting weekly, to explore the possible facilities that will be good for all types of wheels – bikes, skateboards, roller skates and blades, scooters, balance bikes, etc.

After listening to lots of people and having looked at lots of alternatives, the young people have designed one solution that they feel will not spoil anyone else's enjoyment of the village playing field and will allow them to have an amazing safe space, in the heart of their village.

Their idea is to use the MUGA, which they think is currently underused, unappealing, and grey. The young people think that this plan will be fantastic for both older and younger people in Levens (and maybe even some brave adults).

The village consultation in July 2021 attracted over 80 people, who came to see proposals for the two new projects, discuss, ask questions, and leave comments.
